PROFESSIONAL SUMMARY

Senior Software Engineer with 25+ years of experience architecting high-performance cloud, API, and enterprise systems across on-prem, AWS, and Azure. Proven track record of translating ambiguous product requirements into scalable architectures that manage 100M+ record datasets and \$50M+ financial pipelines. Expert player-coach adept at technical discovery, client-facing consulting, and cross-functional leadership across product, DevOps, and engineering stakeholders. Focused on delivering high-availability, defect-resistant systems with rigorous documentation and clarity.

CORE ARCHITECTURE CAPABILITIES

- **Architecture & Solution Design:** Cloud Architecture (AWS, Azure, GCP), API Architecture (REST, Integration Patterns), Microservices, Hybrid/Multi-Cloud Systems, Event-Driven & ETL Pipelines, Scalability & Performance Engineering.
- **Technical Leadership:** Cross-Functional Alignment, Discovery & Requirements Translation, Client-Facing Consulting, Pre-Sales Support, Developer Mentorship, Full Lifecycle Ownership.
- **Engineering Foundations:** SQL Server, PostgreSQL, .NET (C#, VB), Node.js, Python, TypeScript, CI/CD Pipelines, DevOps Collaboration, Minimal-Downtime Deployments, Dynamics GP/CRM Integration.

SELECTED ACHIEVEMENTS

- **Data Scale:** Architected ETL and CI/CD pipelines that consolidated 100M+ record datasets across corporate acquisitions with zero data drift.

- **System Integrity:** Eliminated systemic inventory and pricing drift across distributed platforms, recovering and securing financial reporting accuracy for enterprise systems.
- **Cloud Modernization:** Orchestrated multi-cloud transitions (AWS, Azure, GCP) that achieved 25% operational overhead reductions and 99.99% system availability.
- **Process Automation:** Built custom CRM extensions that automated manual lead tracking workflows, saving sales teams 5+ hours weekly per user.

PROFESSIONAL EXPERIENCE

Software Engineer | KUBRA Data Transfer Ltd
Mississauga, ON | 2022–2025

- Engineered SQL Server migrations for 1TB+ mission-critical datasets, maintaining < 1 hour of downtime across 50M+ rows.
- Architected scalable cloud and API frameworks to support high-volume billing and financial data systems across hybrid infrastructure.
- Modernized industrial workflows by migrating legacy on-prem systems to distributed multi-cloud architectures (AWS/Azure/GCP), reducing operational overhead by 25%.
- Led technical discovery sessions with product, QA, DevOps, and engineering teams to transform complex business rules into end-to-end codebases.
- Authored system architecture diagrams, technical proposals, and validation documentation to eliminate project scope creep and unify cross-functional delivery.

Solutions Engineer | Cherry Tree Co. (Freelance)
Guelph, ON | 2014–Present

- Unified disparate sales and inventory engines post-acquisition, consolidating 40M+ historical records while maintaining 100% data integrity.
- Migrated mid-market enterprise clients from QuickBooks to Dynamics CRM during mergers, preserving financial ledger continuity with 100% user adoption.

- Directed client-facing discovery and solution blueprinting, mapping engineering architectures directly to long-term business scale.
- Delivered embedded consulting, system technical blueprints, and engineering training to ensure long-term client self-sufficiency.

Sr. Programming Consultant | UXC Eclipse (formerly Tectura)
Burlington, ON | 2002–2014

- Developed Microsoft business solutions using .NET (C#, VB), SQL, and JavaScript to extend Dynamics GP capabilities, eliminating core manual workarounds for back-office teams.
- Executed end-to-end ETL pipelines for mission-critical accounting engines, achieving 100% data continuity with zero business operations disruption.
- Built custom CRM plug-ins that automated manual lead capture pipelines, cutting sales representative administrative overhead by 5+ hours per week.
- Collaborated directly with corporate executives, product owners, and engineering peers to build and deliver production-ready software systems.

TECHNICAL SKILLS

- Languages: SQL, T-SQL, C#, VB, JavaScript, TypeScript, Python
- Frameworks & APIs: .NET, Node.js, React, REST APIs, Microservices
- Cloud Ecosystems: AWS (EC2, RDS, S3), Azure, GCP, Hybrid Architectures
- Databases: SQL Server, MySQL, PostgreSQL, MongoDB, NoSQL
- DevOps & Systems: CI/CD pipelines, Git, Docker, Kubernetes, ETL, HA/DR
- Applications: Dynamics GP, Dynamics CRM, QuickBooks
